Designated Safeguarding Lead (DSL) – Mr Ben Lewis

Head of Computing – Mr D Kling

Bishop Perowne College Acceptable Use Agreement

I understand that I must read and abide by the Acceptable Use Policy, to both keep myself safe and protect others from potential harm when using computers at Bishop Perowne College.

There is significant detail in the policy that I agree to read and abide by. It is summarised by following principles:

1. I will only use the network and the College's computers for appropriate school-work and communication.
2. I will act maturely and politely in all that I say and do online.
3. I will do all that I can to ensure the College's network and computers stay secure.
4. I accept that all of my actions have consequences, particularly online and so will think before I speak and treat others like I want to be treated. Anything that happens using my account is my responsibility.
5. There are many laws, both British and International, and I must comply with them. This includes the promotion of British Values and Standards and prevention of extremism.
6. I understand that the school may monitor my use of the school's systems, devices and digital communications for my own personal safety.
7. I will immediately report any unpleasant or inappropriate material or messages or anything that makes me feel uncomfortable when I see it online.
8. If I, or someone I know is in trouble online, I will speak to an appropriate member of staff so that their safety can be ensured.
9. I understand that the school also has the right to take action against me if I am involved in incidents of inappropriate behaviour, that are covered in this agreement, when I am out of school and where they involve my membership of the school community (examples would be cyber-bullying, use of images or personal information).
10. I understand that if I fail to comply with this AUP, I will be subject to disciplinary action. This may include confiscation of personal devices, loss of access to the school network / internet, detentions, suspensions, contact with parents and in the event of illegal activities involvement of the police.

I have read, understood and agree to comply with the Acceptable Use Policy.

Acceptable Use Policy

The Bishop Perowne College Acceptable Use Policy is an extension of School Rules specifically covering the use of the Bishop Perowne Network and any electronic equipment connected to it. The use of the Bishop Perowne College Computer Network and Internet via that network is a privilege and not a right, granted by the College to you the network user and should not be abused in any way. Any misappropriation of the network, or violation of the following rules and conditions is an infringement of school rules, and will therefore be met with disciplinary action.

The purpose of the Bishop Perowne Network is to assist the user in an academic environment as an academic tool. The intent of this policy is to set out rules for the user, to guide them in the correct usage of the network, preventing the user from misuse. Connection to the Bishop Perowne Network will result in automatic acceptance of the policy and agreement to comply.

Bishop Perowne, Church of England College ensures that children are safeguarded from potentially harmful and inappropriate online material. We have an effective whole College approach to online safety empowers us as a College, to protect and educate students, our staff in their use of technology and establishes mechanisms to identify, intervene in, and escalate any concerns where appropriate. This includes educating our students about the appropriate behaviours and critical thinking skills to enable them to remain both safe and legal when using the internet and related technologies. This is done through Assemblies, our Student Bulletin, Tutor activities as well as our PSHE and IT lessons as well. We also ensure that filters are in place to prevent access to unsuitable sites and we will monitor the use of the school network and internet (via Impero) to ensure that any student or staff member attempting to access inappropriate, abusive or harmful material is appropriately advised, supported and if necessary sanctioned. Following the Covid-19 pandemic and subsequent lockdowns, we have increasingly used online platforms for our students to work from home. We will continue to advise parents/carers on how to keep their son/daughter's safe whilst using the internet and how to manage and report concerns accordingly. Staff are aware that abuse can take place solely online as well. The breadth of issues classified within online safety is considerable, but can be categorised into four areas of risk:

Content

Being exposed to illegal, inappropriate or harmful content, for example:

- Pornography
- Fake news
- Racism
- Misogyny
- Self-harm
- Suicide
- Anti-Semitism
- Radicalisation and extremism

Contact

Being subjected to harmful online interaction with other users, for example:

- Child on child pressure
- Commercial advertisements
- Adults posing as children or young adults with the intention to groom or exploit them for sexual, criminal, financial or other purposes.

Conduct

Personal online behaviour that increases the likelihood of, or causes, harm, for example:

- Making, sending and receiving explicit images (e.g. consensual and non-consensual sharing of nudes and semi-nudes and/or pornography)
- Sharing other explicit images and online bullying.

Commerce

Risks such as:

- Online gambling
- Inappropriate advertising
- Phishing and/or financial scams.

These scams can also be reported to the Anti-Phishing Working Group at the following: APWG | Unifying The Global Response To Cybercrime

We ensure online safety is a running and interrelated theme whilst devising and implementing policies and procedures including how online safety is reflected in other relevant policies. We consider online safety whilst planning the curriculum, any teacher training, the role and responsibilities of the Designated Safeguarding Lead and engaging with parents to raise an awareness in order to support their children.

Use and Procedures

All authorised users of the network are assigned a Bishop Perowne College network username and password. No person should attempt to gain access to the network using credentials that have not been assigned to them or access other users' data.

Under no circumstances should a user attempt to traverse and or bypass the Bishop Perowne College internet filtering system. Any security gaps identified should be referred to the IT department immediately. Failure to do so, or attempting to exploit any vulnerabilities found will be considered a serious disciplinary issue.

Bring Your Own Device (BYOD)

Bishop Perowne, Church of England College have a clear policy on the use of mobile and smart technology. We understand the fact many children have unlimited and unrestricted access to the internet via mobile phone networks (i.e. 3G, 4G and 5G). This access means some children can sexually harass, bully, and control others via their mobile and smart technology, share indecent images consensually and non-consensually (often via large chat groups) and view and share pornography and other harmful

content possibly whilst at school. We have carefully considered how this is managed on our premises and reflect this in our policies. Mobile phones are not permitted onsite and should be confiscated if seen.

Only with express permission from the Headteacher, or delegated person(s), the College permits pupils to use their portable devices in learning spaces. Acceptable devices are laptops or tablet PCs ideally with a physical keyboard. Mobile phone devices are not acceptable.

When using a personal device, you must not take pictures or record videos of staff or other pupils without their permission. If these are taken for educational reasons then these images should then be transferred to the school network as soon as possible and then deleted from the personal device. If someone else asks you to delete an image or video of them stored on your device, you should do so immediately.

Your personal computer, laptop or mobile devices should:

- Have a fully licensed copy of an up to date operating system.
- Have fully licensed and up to date Anti-Virus software installed.
- Only have legal and licensed software and Apps installed.
- Users should be mindful of the age limits for App purchases and use, and should ensure they read the terms and conditions before use.
- Not store any personal data relating to Bishop Perowne College pupils or staff on them.

When personal devices are permitted:

- All personal devices are restricted through the implementation of technical solutions that provide appropriate levels of network access.
- Personal devices are brought into the school entirely at the risk of the owner and the decision to bring the device in to the school lies with the user (and their parents/carers) as does the liability for any loss or damage resulting from the use of the device in school.
- The school accepts no responsibility or liability in respect of lost, stolen or damaged devices while at school or on activities organised or undertaken by the school (the school recommends insurance is purchased to cover that device whilst out of the home).
- The school accepts no responsibility for any malfunction of a device due to changes made to the device while on the school network or whilst resolving any connectivity issues.
- The school recommends that the devices are made easily identifiable and have a protective case to help secure them as the devices are moved around the school. Pass-codes or PINs should be set on personal devices to aid security.
- The school is not responsible for the day to day maintenance or upkeep of the user's personal device such as the charging of any device, the installation of software updates or the resolution of hardware issues.
- The school may install network monitoring software onto the device in question in order to ensure the safety of the network and its users.

Security

All Authorised Bishop Perowne College Network users are issued with login credentials. Protecting your personal credentials is essential to the security of the network, your personal computer and your personal data. As guidance the following security rules should be followed:

- Your Password should be
 - at least 7 characters.
 - a capital letter, number or other characters such as '@'
 - changed every 2 months as a minimum
 - private to you and not shared with anyone else.
- Users under no circumstances should attempt to log in as a systems administrator.
- If a user identifies any kind of security issue with the Bishop Perowne College Network or the Internet. The user must notify the IT department immediately, and not demonstrate the problem to another user.
- Users should never attempt to circumvent the College's security measures via port scanning, tunnelling, proxy avoidance or any other means, to discover holes in the firewall.
- Users are responsible for preventing the spread of viruses and other destructive programs such as batch files. Emailing them around is strictly forbidden.

If a user is suspected to be acting outside the Acceptable Use Policy, their network usage may be monitored, restricted, removed and reported to the relevant Pastoral team and Senior Leaders. Any resulting disciplinary procedures will be applied by the appropriate member of staff.

Vandalism and Harassment

No users must ever intentionally attempt to vandalise Bishop Perowne IT equipment, and/or harass others, with examples being:

- An attempt to harm, modify or destroy data of another user, the Bishop Perowne network, and the Internet in accordance with the Computer Misuse Act.
- Transmitting or creating malware via the Bishop Perowne network or Internet.
- Attempting to harm, modify or destroy hardware, devices and software that belong to Bishop Perowne College, staff or pupils.
- Attempting to disrupt the Bishop Perowne network and/or Internet.
- Disrupting the work of other users or denying services to others (for example, by deliberate or reckless overloading or disabling of equipment).

Bishop Perowne College regards the following as harassment:

- Persistent annoyance of another user.
- Interference with another user's work.
- Sending or forwarding of unwanted email or malware/batch files as attachments.
- Posting inappropriate material or messages on social media, messaging apps or websites.

- Accessing another user's account and sending / forwarding inappropriate mail.

All our staff are aware that children can abuse other children (formerly referred to as peer on peer abuse). And, that it can happen both inside and outside of our College as well as online. It is important that all our staff recognise the indicators and signs of child on child abuse and know how to identify it and respond to reports. All our staff understand that even if there are no reports of it happening it does not mean it is not and it may be the case that it is just not being reported. As such it is important if staff have any concerns regarding child on child abuse, they should speak to the Designated Safeguarding Lead (DSL) or Deputy Designated Safeguarding Leads (DDSLs).

All our staff understand the importance of challenging inappropriate behaviours between children, many of which are listed below, that are actually abusive in nature. Downplaying certain behaviours, for example dismissing sexual harassment as "just banter", "just having a laugh", "part of growing up" or "boy being boys" can lead to a culture of unacceptable behaviours, an unsafe environment for children and in worst case scenarios a culture that normalises abuse leading to children accepting it as normal and not coming forward to report it. Child on Child abuse is most likely to include, but may not be limited to:

- Bullying (including cyberbullying, prejudice-based and discriminatory bullying)
- Abuse in intimate personal relationships between peers
- Physical abuse such as hitting, kicking, shaking, biting, hair pulling, or otherwise causing physical harm (this may include an online element which facilitates, threatens and/or encourages physical abuse)
- Sexual violence, such as rape, assault by penetration and sexual assault;(this may include an online element which facilitates, threatens and/or encourages sexual violence)
- Sexual harassment, such as sexual comments, remarks, jokes and online sexual harassment, which may be standalone or part of a broader pattern of abuse
- Causing someone to engage in sexual activity without consent, such as forcing someone to strip, touch themselves sexually, or to engage in sexual activity with a third party
- Consensual and non-consensual sharing of nudes and semi nudes' images and or videos (also known as sexting or youth produced sexual imagery)
- Upskirting, which typically involves taking a picture under a person's clothing without their permission, with the intention of viewing their genitals or buttocks to obtain sexual gratification, or cause the victim humiliation, distress or alarm
- Initiation/hazing type violence and rituals (this could include activities involving harassment, abuse or humiliation used as a way of initiating a person into a group and may also include an online element)

All our staff are clear as to the College's policy and procedures with regards to Child on Child abuse and the important role they have to play in preventing it and responding where they believe a child may be at risk from it.

Furthermore, the Bishop Perowne College Network and Internet connection must not be used to break any relevant UK laws, regulations or policies or in a way that could disrupt access for other users. This includes:

- Unauthorised access to the network, servers, software, internet, facilities and data.
- Misuse of the Bishop Perowne College network, Internet and resources.
- Creation or transmission of any offensive or obscene media, messages or material.
- Creation or transmission of material that may cause annoyance, inconvenience or anxiety.
- To promote extremism organisations, extremist views or resources.
- Creation or transmission of material with the intent to defraud or infringe copyright.
- Creation or transmission of unsolicited bulk or marketing material unless the recipient has specifically requested it.

Filtering & Monitoring

Bishop Perowne, Church of England College ensure that all possible measures are in place to limit student's exposure to inappropriate content, contact, conduct and commerce via the school's IT system. Our Governing body ensure our school has appropriate filters and monitoring systems (Impero) in place and review their effectiveness. Our Leadership team and relevant staff have an awareness and understanding of the provisions in place and manage them effectively and know how to escalate concerns when identified. We also consider the age range of their children, the number of children, how often they access the IT system and the proportionality of costs verses safeguarding risks.

Internet access is filtered for all users, but differentiated internet access is available for staff and customised filtering changes are managed by the school. It is important to recognise that no filtering systems can be 100% effective and need to be supported with good teaching and learning practice and effective supervision. The school will therefore monitor the activities of users on the school network and on school equipment whereby the monitoring process alerts the school to breaches of the filtering policy, which are then acted upon. Where personal mobile devices are allowed internet access through the school network, filtering will be applied that is consistent with school practice.

Filtering systems are only ever a tool in helping to safeguard children when online and schools have an obligation to *"consider how children may be taught about safeguarding, including online, through teaching and learning opportunities, as part of providing a broad and balanced curriculum"*.

Network usage is monitored by the Impero system which detects keywords from a range of libraries related to potential misuse of the network. This will be monitored by a member of the Safeguarding Team and IT technical staff and, where required, reported back to other staff (e.g. the Lead DSL) and other stakeholders, including Parents/Carers.

Controversial Material

All users are responsible for the contents of their machine, including any illegal material found under their profile regardless if they were using the profile or not, including anything downloaded from the Internet.

All users should report any controversial material they find to the IT Department for removal. The IT Department will remove the material if it is appropriate to do so. Controversial material includes the list of items above in the vandalism and harassment section and any other inappropriate material including any resulting from activity which is illegal under UK Law. Students should also be aware of their obligation to report any activity or evidence that promotes extremism, in line with the PREVENT guidelines.

As with all Colleges we are subject to a duty under Section 26 of the Counter-Terrorism and Security Act 2015 (the CTSA 2015), in the exercise of our functions, to have “due regard to the need to prevent people from being drawn into terrorism”. This duty is known as the Prevent Duty. The Prevent Duty is part of our College’ wider safeguarding obligations. The Designated Safeguarding Lead (DSL) or Deputy Designated Safeguarding Leads (DDSL’s) along with other senior leaders are familiar with the revised Prevent Duty Guidance (Prevent Duty Guidance: for England and Wales,) The Designated Safeguarding Lead (DSL) or Deputy Designated Safeguarding Leads (DDSL’s) will make referrals in accordance with West Midlands Child Protection procedures and will represent our College at Channel meetings as required. There is additional guidance: Prevent Duty Guidance: for Further Education Institutions in England and Wales that applies to Colleges (Prevent Duty Guidance: for Further Education Institutions)

Bishop Perowne College assumes no responsibility for the content of websites over which it has no control. The School attempts to minimise access to inappropriate, malicious or offensive material. Bishop Perowne College will not be responsible for unauthorised financial obligation resulting from access to the Internet through the Bishop Perowne Network.

Any concerns should be reported face to face to the Designated Safeguarding Lead (DSL) or Deputy Designated Safeguarding Leads (DDSL’s) immediately so appropriate steps can be taken as quickly as possible.

Network Communication and File sharing

File sharing via peer to peer (P2P) networks of any kind on the Bishop Perowne College Network and internet is strictly forbidden. This includes but is not limited to:

- File sharing via Peer to Peer (P2P) networks or removable hard drives
- All file sharing or torrenting software
- Web sites designed to share files e.g. MegaUpload
- Create a sub network or domain

Users are also forbidden from trying to circumnavigate the Bishop Perowne College internet filtering system. This includes but is not limited to:

- Server devices and software
- Router software and devices
- Proxy software, websites and devices
- Devices and software intended to hide the identity of the device and/or user

- Devices and hardware intended to extract or eavesdrop on the network

Use of Email

At Bishop Perowne all students are given an Office 365 account, including email. The following guidelines cover the use of Electronic Mail on the Bishop Perowne College Network, and through it to the Internet:

- Use of email is a privilege, not a right. As such, the privilege may be revoked at any time and for any reason. All email can be accessed and stored, and where it is deemed necessary the IT department will not hesitate to block or review email usage.
- Write all messages and emails in correctly formatted English. Proof read everything.
- You must not send or forward chain emails, 'spam', malware or batch files.
- You must not forge emails or post anonymous messages
- Email is not something that can be regarded as being private. Think before you send!
- The use of extremist, racist, sexist, threatening or otherwise discriminatory and objectionable language in email messages is strictly forbidden.

Use of Microsoft Teams and Remote Learning

Bishop Perowne, Church of England College recognises the importance of remote learning and the potential risks this may present to children, parents/carers and staff. Therefore, we make regular contact with parents and carers to reinforce the importance of children being safe online. This includes regular signposting of where parents and carers can access additional advice and information about supporting their child online and how to report incidents if necessary. The school also provides clear advice and guidance about remote learning to all stakeholders to ensure that everyone is safe. This is periodically published especially when we are moving to a more substantive period of remote learning. Additional support is also available via the NSPCC by following this link: [Undertaking remote teaching safely](#)

In some circumstances, e.g. during the Covid-19 closure, we adopt Microsoft Teams as an online learning platform where teachers deliver lessons and speak with students virtually. Students must ensure that:

- They wear suitable clothing
- Any computers used should be in appropriate areas, for example, not in bedrooms; and the back ground should be blurred, if possible
- Language must be professional and appropriate, including any family members in the background
- Unless otherwise specified, student cameras should remain off during live lessons

Plagiarism

Users should take care when using the internet to research information for academic work. Plagiarism is a breach of school and examination board rules and can involve liability for copyright infringement. Passing off another's work as their own will be classed as plagiarism and a breach of school rules. This includes the use of Artificial Intelligence to complete work, without citation.

Network Etiquette (Netiquette)

Network Etiquette describes what is expected of a user, whilst using the Bishop Perowne College network and internet. This includes but is not limited to, the following:

- Be polite – treat others as you would want to be treated
- Do not send abusive or derogatory messages to anyone
- Respect other people's privacy, particularly on social media
- Do not give out personal information about yourself or other students/staff
- Minimise the use of acronyms (e.g. OMG, BTW)
- Don't engage in activities that are prohibited under UK law. Thus the transmission of material subject to copyright or protected by trade secret is forbidden, as is any threatening, bullying or obscene matter.
- Don't take part in, or promote, websites or online groups/chats that encourage extremist activities.

Software, Music and Video Copyright

The Bishop Perowne College IT department, have to abide by licensing law. All software installed on the Bishop Perowne College Network belongs and is licenced to Bishop Perowne College. Strict policies are in place to prevent pupils and non-IT staff from installing software. Under no circumstances should you attempt to install software of any kind or copy films and music to the network.

The College does not condone the unlicensed copying or use of software illegally. The liability for violating copyright in such cases is likely to rest with the individual concerned.

Personal Data

Bishop Perowne College cannot accept responsibility for loss of data from your personal computer, whatever the cause. This includes the Cloud based OneDrive section of Office 365. Excessive storage consumption will be monitored with unnecessary media periodically removed.

Confiscation, Search & Deletion

Headteachers and staff they authorise have a statutory power to search a student or their possessions where they have reasonable grounds to suspect that the student may have a prohibited item listed:

Prohibited List

- Knives and weapons
- Alcohol
- Illegal drugs
- Stolen items

Or any article that a member of staff reasonably suspects has been, or is likely to be used:

- To commit an offence
- To cause personal injury to, or damage to property of; any person (including the student)

Or an article specified in regulations:

- Tobacco and cigarette papers
- Fireworks
- Pornographic images

Banned List:

We also include e-cigarettes/vapes and/or any item considered to be potentially dangerous. These are banned items in school.

Authorised staff members can confiscate any item they find that they have reasonable grounds for suspecting:

- Poses a risk to staff or pupils
- Is a prohibited or banned item
- Is evidence in relation to an offence

Authorised staff members may examine any data or files on an electronic device that they have confiscated, if they have good reason to do so. You should reasonably suspect that the device has (or could be used to):

- Cause harm
- Undermine the safe environment of the school or disrupt teaching
- Commit an offence

In considering whether a search is necessary the Headteacher or authorised staff member will:

- Make an assessment of how urgent the search is, and consider the risk to other students and staff
- Explain to the student why they are being searched, how and where the search will happen, and give them the opportunity to ask questions about it
- Always seek the student's cooperation

If a student refuses to cooperate the authorised member of staff will first consider why this is, and act proportionally. It may be that the student:

- Is in possession of a prohibited or banned item
- Doesn't understand your instructions or what a search will involve
- Has had a previous distressing experience of being searched

If the student still refuses to cooperate the Headteacher/ Deputy Headteacher/ Lead DSL or the Deputy Headteacher in charge of Behaviour should be informed to help support and advise the next steps. During this time, the student may be supervised somewhere away from other students. Next steps may include:

- A further sanction in line with our behaviour policy,
- Involving parents/carers

- Involving the Police
- Use of reasonable force to conduct the search for a prohibited item. Taking this option should be a last resort to prevent the student from harming themselves or others, damaging property or causing disorder. Reasonable force can only be used to search for items on the Prohibited List and those items banned by the school (Banned List).

If a search is deemed necessary we will search the student in an appropriate location that offers privacy away from other students. Authorised staff can search a student's pockets and require students to remove outer clothing, meaning clothes that are not worn directly next to the skin or over underwear. Outer clothing also includes:

- Gloves
- Scarves
- Shoes

We may use a 'wand' to help support the search. Authorised staff can search lockers, desks and bags in the presence of the student and another member of staff. The member of staff conducting the search must be of the same sex as the student being searched. There must be another member of staff present as a witness to the search. There is a limited exception to this rule. This is that a member of staff can search a student of the opposite sex and/or without a witness present only:

- If the member of staff carrying out the search reasonably believes there is risk that serious harm will be caused to a person if the search is not carried out as a matter of urgency; and
- In the time available, it is not reasonably practicable for the search to be carried out by a member of staff who is same sex as the pupil or it is not reasonably practicable for the search to be carried out in the presence of another member of staff.

In the rare occasions where a member of staff conducts a search without a witness they should immediately report this to another member of staff, and ensure a record of the search is kept.

Our school staff are not allowed to carry out strip searches, including the Headteacher and authorised staff. Only police who have been asked to come to the school may decide whether a search is necessary and carry it out. The police can only carry out a search if they:

- Think this is necessary to remove an item related to a criminal offence, and
- Reasonably consider the student might have concealed such an item

Therefore, we will only call the police into school as a last resort. We will always put the best interest of the child first. This means that before we decide to call the police into school we will:

- Make sure that we've exhausted other approaches
- Carefully weigh up the risks to the student's mental and physical wellbeing with the need to conduct a search

On these occasions the school role is to act as an advocate for the student and their well-being. The police cannot overrule your safeguarding duty, for example by requesting that the appropriate adult

leave the room when they talk to the student. The police must follow on page 13 of the DfE's searching, screening and confiscation guidance throughout.

All searches must be recorded on CPOMS and the parents/carers should be informed.

Further details can be found at:

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/1091132/Searching__Screening_and_Confiscation_guidance_July_2022.pdf

Staff are authorised to confiscate electronic devices, examine any data on the device if they think there is a good reason to do so. (i.e. the staff member reasonably suspects that the data or file on the device in question has been, or could be, used to cause harm, to disrupt teaching or break the school rules). The initial examination of the data / files on the device should go only as far as is reasonably necessary to establish the facts of the incident.

Following an examination of an electronic device, if the member of staff has decided to return the device to the owner, they may ask the student to erase any data or files, if they think there is a good reason to do so. If however the member of staff decides to retain the device since the content is of a more inappropriate nature, they must inform the pupil that they are passing the matter (and device) over to the relevant members of staff. Depending on the content a decision will be made to delete that material, retain it as evidence (of a possible criminal offence or a breach of school discipline) or whether the material is of such seriousness that it requires the involvement of the police.

Any concerns should be reported face to face to the Designated Safeguarding Lead (DSL) or Deputy Designated Safeguarding Leads (DDSL's) immediately so appropriate steps can be taken as quickly as possible.

Sanctions

Any breach of these guidelines may result in disciplinary action under the school's disciplinary procedures. These can be found in the Behaviour and Relationships Policy.

All users of the Bishop Perowne Network are responsible for respecting UK and international law. In the event of any action by proper authorities against any user, Bishop Perowne College will fully comply with the authorities to provide any information necessary for investigation and compliance.
